

The TRS and TRC series consists of rotary tables designed to count and store moulded pieces in bags or boxes. The control panel of these rotary tables interfaces with the press so as to count machine cycles. It is possible to collect moulded pieces in various containers even when the operator is not supervising the machine. Their structure is made of stainless steel and the frame is equipped with wheels so that they can be easily moved.

TRC model

TRS model

TECHNICAL DATA			TRC 2	TRC 3	TRS 2	TRS 3
Motor power	kW		0.37
